

# The **heat pump** training pathway.

# The training pathway.

**If you are looking to learn about heat pumps, become qualified or complete specialist product training, we offer a range of courses to suit all levels.**

The complete training pathway to become a heat pump installer can be carried out through Expert Academy with a range of OnDemand and in-person courses and qualifications.

## **ON-DEMAND INTRODUCTION TO HEAT PUMPS**

### **On-Demand - Introduction to Heat Pumps**

This is a foundational course, ideal for beginners and is available online. You will get an insight into everything from how a heat pump works, different types of refrigerant and electrical considerations. This course provides you with a comprehensive understanding and the ideal introduction to in-person training.

**Scan to access  
ON-DEMAND**

The below courses are only available to book directly through Expert Academy. They are available for existing heating engineers that meet required prerequisites. enquiries@expertacademy.co.uk

### **Heat pump installer**

Providing qualifications in water regulations, low temperature system design and ASHP systems.

### **Heat pump and F-Gas installer**

Completing this course provides an MCS recognised BPEC heat pump systems qualification and a City & Guilds 2079 F-Gas qualification.

### **Advanced heat pump technician**

The course includes both City & Guilds 2079 F-Gas qualification and 6187-21 hydrocarbon refrigerants qualification. This course is for those serious about completing service and repair work of all types on ASHP's.

## **HEAT PUMP QUALIFICATION PACKAGES**

## **PRODUCT TRAINING (LOGIC AIR OR HP290)**

### **Product Training (Logic Air or HP290)**

This course is for qualified heat pump engineers who have prior experience and knowledge of working with heat pumps.

This training session showcases the simple and quick installation features of our heat pump ranges, supporting you to complete your first installation with no hassle or time wasted.

**We pride ourselves in providing you honest, balanced information, investing in developing our training techniques and skills so that you benefit from the best possible training experience.**

Our courses utilise modern training practises to help you best retain knowledge, build skills and enjoy the experience.

# Best-in-class training.

We are approved BPEC, BESA and City and Guilds assessment centres so you can be assured we maintain high standards of quality and consistency.
