# MARKET LEADERS IN HEATING & HOT WATER

---

At Ideal Heating we believe in making things as easy as possible. That's why we combine ease of installation with high levels of quality and reliability. We rigorously test each and every one of our products with dozens of safety and reliability checks before they leave our Yorkshire based factory.

Our range of boilers has been awarded the Good Housekeeping reader recommended status seven years in a row.

**Consistently the UK's leading heating manufacturer.**

# LOGIC COMBI

**BOILER** 24 30 35 kW

Scan me for full technical specification

Available in a choice of three outputs of 24, 30 and 35 kW, the Logic Combi range of combination boilers from Ideal Heating, provides a hassle free and simple solution for today's social housing market.

**2+ YEARS WARRANTY\***

## KEY FEATURES

- ✓ Flexible warranties available, 2 years as standard
- ✓ Compact cupboard fit
- ✓ Easy to see pressure gauge
- ✓ Digital display
- ✓ Built in frost protection
- ✓ Opentherm ready
- ✓ Flue variants
- ✓ LPG conversion<sup>††</sup>
- ✓ NOx class 6
- ✓ ErP compliant

**ADD A WEATHER  
COMPENSATION KIT FOR  
GREATER EFFICIENCY**

## OVERVIEW

Our new Logic Combi boilers are quick and easy to install in social housing, fitting easily into a standard kitchen cupboard. With flexible warranty options\*, the Logic Combi is fully ErP compliant, compatible with other green heating technologies and has an intelligent preheat function to reduce household energy consumption. Available in outputs of 24, 30 and 35kW.

This evolution retains everything you love about the current Logic, but with a range of new features and components that make it even easier for your engineers to install, service and maintain.

Integrate Logic with Link Cellular our remote boiler monitoring solution for greater control of your maintenance costs, compliance and tenant welfare.

## AWARD WINNING BOILERS

Our boilers have been awarded Good Housekeeping Reader Recommended status seven years in a row. For ease of use and low noise levels amongst other outstanding product details that left customers wanting to recommend Ideal Heating to their friends and families.

SAP INDEX	PRODUCT CODE	BRAND NAME	MODEL NAME	NOx Emissions (mg/kWh)	NOx Class
019006	228307	Ideal Heating	Logic Combi 24	28	Class 6

# LOGIC HEAT

**BOILER** 12 15 18 24 30 kW

Scan me for full technical specification

Available in the choice of five outputs - 12, 15, 18, 24 & 30kW, the Logic Heat will deliver total home comfort for a wide range of domestic properties.

**2+ YEARS WARRANTY\***

## KEY FEATURES

- ✓ Flexible warranties available, two years as standard
- ✓ Compact cupboard fit
- ✓ Digital display
- ✓ Built in frost protection
- ✓ Rear flue output option
- ✓ Opentherm ready
- ✓ Flue variants
- ✓ LPG conversion<sup>††</sup>
- ✓ NOx class 6
- ✓ ErP compliant
- ✓ Reduced running costs due to class leading efficiency
- ✓ Compatible with Halo Controls

**OPENTHERM  
READY**

## OVERVIEW

Suitable for open vent and sealed systems, the Logic Heat boiler is straightforward to site and install. Benefiting from no compartment ventilation, compact fit, and a lightweight design means the boiler can be neatly installed out of sight into a kitchen cupboard†. Installers have the further choice of a neat direct rear flue option as required, helping to speed up the installation in retrofit situations even further.

High SEDBUK efficiency rated and capability of modulating down to 4.8kW\*\*, the Logic Heat is highly efficient and easy to operate thanks to straightforward controls featuring a clear digital display.

The Logic Heat is a reliable and efficient heat only solution for domestic installations.

## THE PERFECT SYSTEM

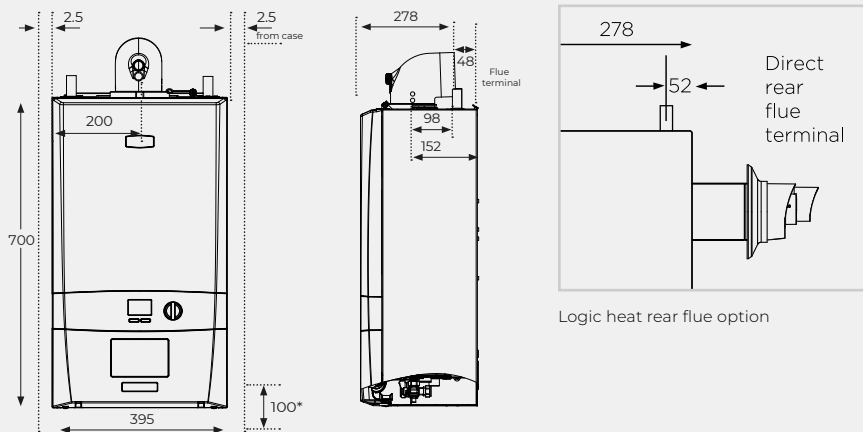

The Logic Heat boiler is the perfect match for the new Ideal Pre-Plumbed H cylinder. As with all Ideal products, you can be assured reliability is engineered, through quality design and testing, supported by a 25 year cylinder warranty.

Our range of pre-plumbed cylinders have been created specifically for the new build market. They offer a 'plug and play' solution which reduces installation time and standardises plumbing configuration across multiple dwelling sites.

**TESTIMONIAL**  
**ASTER HOUSING GROUP**

*“We have been installing Ideal Heating for the past 10 years, specifically the Logic Standard and ESP1 range.”*

“We receive a same day-next day response on our 5-year warranty work and training is provided on boilers as required for new engineers.”

“Over the last 12 months we have installed over 850 boilers having very few issues, the product related visit rate is less than 1.5% on over 5,000 boilers that are under warranty at any one time and because of this I would recommend the Ideal Logic boiler range.”

“We are to install over 1,300 Boilers a year in planned maintenance and social new build, with Ideal Logic being the majority of those Installations.”

# LOGIC CODE COMBI ESP1

**BOILER** 26 33 38 kW

Scan me for full technical specification

Designed to take the headache out of meeting Building Regulations, the Logic Code Combi ESP1 from Ideal is a simple one box solution. Developed using state of the art advanced boiler technology, the ESP1 models optimise design for SAP and DER ratings.

**2+ YEARS WARRANTY\***

## KEY FEATURES

- ✓ Flexible warranties available, 2 years as standard
- ✓ Compact cupboard fit
- ✓ Easy to see pressure gauge
- ✓ Simple user interface
- ✓ Frost protection
- ✓ Opentherm ready
- ✓ Flue variants
- ✓ LPG conversion†
- ✓ NOx class 6
- ✓ ErP compliant
- ✓ Passive flue gas heat recovery unit
- ✓ Compatible with Halo Controls

**IDEAL HEATING'S  
MOST EFFICIENT  
BOILER RANGE**

## OVERVIEW

Developed using state of the art advanced boiler technology, the Code Combi ESP1 features a built-in stainless steel passive flue gas heat recovery unit located in the flue exit, which cleverly picks up and recycles waste energy that would have normally been lost through the flue terminal.

This energy is collected and used to warm up the cold hot water supply. This supply, then flows into the plate heat exchanger, where the desired temperature is reached.

With a dedicated in-house design team and service network for developers and installers The Logic Code Combi ESP1, with its NOx class 6 rating and integral FGHR unit, takes the pressure, and cost, off meeting Building Regulations.

## AWARD WINNING BOILERS

Our boilers have been awarded Good Housekeeping Reader Recommended status seven years in a row. For ease of use and low noise levels amongst other outstanding product details that left customers wanting to recommend Ideal Heating to their friends and families.

SAP INDEX	PRODUCT CODE	BRAND NAME	MODEL NAME	NOx Emissions (mg/kWh)	NOx Class
018121	215735	Ideal Heating	Logic Code Combi ESP1 26	24	Class 6
018122	215736	Ideal Heating	Logic Code Combi ESP1 33	25	Class 6
018123	215737	Ideal Heating	Logic Code Combi ESP1 38	32	Class 6

## HOW IT WORKS

- > Hot water tap is opened and boiler senses flow
- > Burner on
- > Combustion gases heat primary water heat exchanger and flue gases exit to the flue
- > Cold water from mains flows through the passive flue gas heat recovery unit in the flue
- > Energy from the flue gases is transferred to the incoming water
- > The cooled flue gases exit the boiler
- > Preheated water enters the boiler and is further heated by the DWH plate heat exchanger
- > Hot water is produced at the tap

## CLEARANCES & DIMENSIONS

All Dimensions in mm

**Note:** The minimum front clearance when built into a cupboard is 5mm from the cupboard door but 450mm overall clearance with the cupboard door open is required for servicing.

\*\*Bottom clearance after installation can be reduced to 5mm. However, 100mm is required for servicing.

† LPG Conversion kit available for 33kW & 38kW models. \*2 year warranty subject to Terms and Conditions.

<b>F9 L9</b>	Unconfigured PCB	Unconfigured PCB. Please contact the social housing provider helpline.
<b>L1</b>	Flow Temperature Overheat or No Water Flow	Check system water pressure is between 1 & 1.5bar on the system pressure gauge. To re-pressurise the system see section 3 of installation guide. If the boiler fails to operate please contact the social housing provider helpline.
<b>L2</b>	Ignition Lockout	1. Check condensate Pipe for blockages (see to section 4 of installation guide). 2. Check other gas appliances in the house are working to confirm a supply is present in the property. 3. If other appliances do not work or there are no other appliances, check the gas supply is on at the meter and/or pre payment meter has credit. If the boiler fails to operate please contact the social housing provider helpline.
<b>L6</b>	False Flame Lockout	Restart the appliance - if the boiler fails to operate please contact the social housing provider helpline.
<b>LC</b>	5 Boiler Resets in 15 minutes	1. Turn electrical supply to boiler off and on. 2. If the boiler fails to operate please contact the social housing provider helpline.
<b>FA</b>	Negative Differential Flow/Return Thermistor	If the boiler fails to operate please contact the social housing provider helpline.
<b>FU</b>	Flow/Return Differential > 50°C	If the boiler fails to operate please contact the social housing provider helpline.
<b>dU</b>	Diverter Valve in midposition for service	Rotate all knobs fully clockwise, turn boiler power off and on then press restart.

# HALO LITE RF

**PROGRAMMABLE ROOM THERMOSTATS  
BOILERS ONLY**

Scan me for full technical specification

The Ideal Halo Lite RF is a single zone combi programmable room thermostat designed to benefit both landlords and tenants.

Boasting a large colour screen and easy to use button and dial interface. It has been tested to ensure it is intuitive and easy to understand.

**2 YEARS WARRANTY\***

## KEY FEATURES

- ✓ Simple dial and button design
- ✓ Backlit colour screen with large text and icons
- ✓ Service timer function
- ✓ Designed with tenant input
- ✓ Boiler plus compliant
- ✓ Wireless
- ✓ Easy to install

**DESIGNED  
WITH  
TENANT  
INPUT**

# HALO

## PROGRAMMABLE ROOM THERMOSTATS BOILERS ONLY

Scan me for full technical specification

### HALO LITE 221528

The Ideal Halo Lite OpenTherm Wired Combi is a single zone combi programmable room Halo Lite comes with the same features and benefits as the Halo Lite RF, but in a wired configuration, reducing the need for battery maintenance.

ALSO COMPATIBLE WITH HP290

### HALO RF 222140

Halo RF is a wireless Programmable room thermostat, designed to work specifically with your Ideal Heating boiler. Halo RF offers you fast, flexible and intelligent wireless technology and is packed with a wide range of features that enable simple and easy heating control, this includes flexible scheduling, override, plus hours, fault notifications, holiday mode and a child lock.

Halo's compact and contemporary design makes it suitable for any home, either modestly mounted to the wall or discretely desktop mounted using the stand.

Halo RF comes in a Combi and Heat & System range.

**SIMPLE DIAL AND BUTTON  
INTERFACE THAT'S EASY  
FOR EVERYONE TO USE**

\*2 year parts and labour warranty available when registered within 30 days of installation. Terms and conditions apply.

## HALO WI-FI 222142

Halo Wi-Fi comes with the same benefits as the Halo RF, but with app-controlled heating, which gives you full control of your heating through your phone or device. Halo is also compatible with Amazon Alexa and Google Home, allowing you to control your heating and find out the temperature, all with your voice.

Halo Wi-Fi comes in a Combi and Heat & System range.

## GEOLOCATION FOR LIFESTYLE BASED HEATING

## HALO 2-ZONE EXTENSION KIT 222145

Enjoy the benefits of a multi-zone heating with the Halo 2-Zone Extension kit.

The Halo 2-Zone Extension kit is available for both Halo RF and Halo Wi-Fi, offering an extra level of heating control. Split your home into two separate zones of heating, setting a separate heating schedule and temperature range for the second zone.

So if you're spending your days downstairs, you can set your upstairs heating to come on later helping to save energy.

The Halo 2-Zone Extension kit is fully modulating on both heating zones, helping to save energy usage.

## TAILORED HEATING OVER 2 ZONES

# REMOTE MONITORING, ACTIONABLE INSIGHTS

The ability to access real time information from the Logic boiler, including performance data and fault codes, brings a whole new level of insight for those managing the heating and hot water demands of a large tenant population.

### Designed in-house

Our Link range is developed in-house specifically for Ideal Heating boilers. This intimate understanding of both our boilers and Link platform enables us to provide a deeper level of insight, unlike 3rd party solutions.

Our Link Cellular module contains a roaming SIM card that communicates to the Partner Portal using mobile phone technology. There's no monthly or yearly data subscription, Link Cellular is a one-off cost for 10 years of data.

Link Cellular can be installed with an OpenTherm controller such as Halo Lite or Halo Lite RF to offer you the greatest insight into the full heating ecosystem, allowing you to see current and target room temperatures.

## LINK CELLULAR MODULE

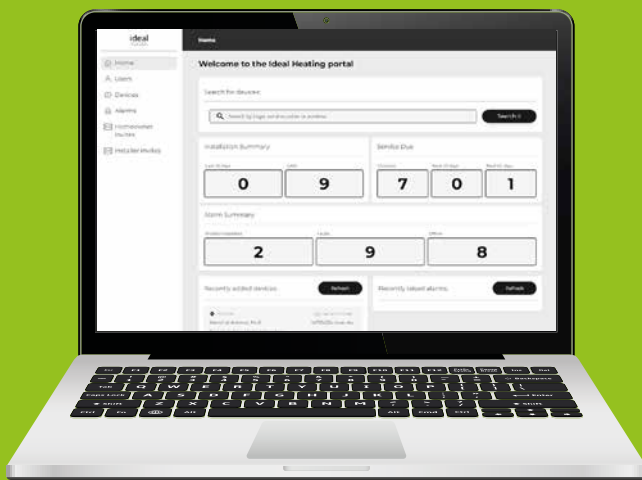

Install in 5 minutes as no external wiring is required, simply plug the module into the aperture on the Logic2. The Link Cellular is powered by low voltage direct from the boiler.

# THE PARTNER PORTAL.

Our purpose-built Partner Portal is designed to make managing your boiler fleet easier and more efficient. With increased loading speeds, all boiler data including faults is sent directly to the cloud, accessible by an unlimited number of user accounts with multiple role options available (admin, installer, user).

The Partner Portal APIs can be integrated into your existing IT systems seamlessly.

## Through the Partner Portal you will have:

1. Full visibility of your boiler fleet with health data, service reminders and fault notifications displayed
2. Access to real time information from each boiler including performance data and fault codes with the ability to remote reset (when safe)
3. The ability to remotely adjust set point temperatures
4. Historical boiler data records to track and chart usage and performance over time

## Actionable insights from the data

Understand tenant usage patterns and behaviours to identify and address unusual activity or possible fuel poverty

Fault codes displayed supporting 'first-fix' maintenance - understand the problem before an engineer visit

View boiler service status with service due notifications for effective management of engineer resource

# REMOTE MONITORING SOLUTION.

Our Link remote monitoring solution helps to support you as a social housing association across multiple areas:

- > **Efficiency**  
Engineer and support centre resource
- > **Tenant welfare**
- > **Sustainability / environmental**
- > **Compliance**

## Key features of our Partner Portal include:

- > Service reminders
- > Email alert and summaries
- > Full visibility including installation numbers and servicing status
- > Unlimited numbers of user accounts
- > Boiler fault & alarm history
- > History/time series data charts
- > API's to integrate the Partner Portal into existing IT systems

## HEAT PUMP 4 5 8 10 kW

4kW - AH750664 | 5kW - AH750665 | 8kW - AH750666 | 10kW - AH750667

The Logic Air heat pump range is our new range of monobloc heat pumps, offering great efficiencies both in heating and hot water. The Logic Air is designed to deliver efficient, simple and reliable low carbon heating in homes throughout the UK.

### KEY FEATURES

- ✓ Designed for the UK climate
- ✓ Quiet operation
- ✓ Up to 60°C hot water in rain, ice and snow
- ✓ Flexible warranty
- ✓ 364 day a year UK customer service
- ✓ SCOP rating up to 519%\*
- ✓ R32 refrigerant

# A+++ EFFICIENCY RATING

### PCDB INDEX

Flow Temp	Logic Air 4kW	Logic Air 5kW	Logic Air 8kW	Logic Air 10kW
Flow temp 35°C	107447	107235	106762	106754
Flow temp 45°C	107446	107234	106761	106753
Flow temp 55°C	107445	107233	106760	106752

\*Performance data in accordance with EN 14825, EN 12102-1, EN 14511. The energy efficiency provided may not correspond to the actual energy once installed in a building, as the efficiency is influenced by other factors such as heat loss in the distribution system and the capacity of the products in relation to building size and characteristics.

## OVERVIEW

Taking the learnings from the award winning Logic boiler, the Logic Air heat pump integrates seamlessly with UK homes, partnered with our best in class pre-plumbed hot water cylinder and our connected Halo Air room thermostat, the Logic Air is quick to install, easy to commission and simple to use.

Our new heat pumps are supported by our industry leading customer service and warranty team which is based in the UK and is open 364 days a year, providing customer service and technical support.

# LOGICAL SOLUTIONS

## EFFICIENCY

The efficiency rating of a heat pump determines how much it costs to use. A high efficiency rating means it costs less to operate.

The Logic Air has one of the highest efficiency ratings in the UK, rated at 5.19 (Coefficient of performance) making it one of the most economical heat pumps on the market.

## SOUND AND DIMENSIONS

Sound and dimensions are important, not just for our customers comfort level, but to MCS and the Planning office. The Logic Air is quiet and compact. Small enough for permitted development with the local planning authority and cutting edge acoustic technology makes its low sound levels amongst the best in the market.

## FAST HEAT PUMP INSTALLATION

Our Logic Air heat pump, pre-plumbed cylinders and Halo Air room thermostat are designed to be amongst the fastest heat pumps to install. Factory fitted components, click and connect wiring terminals reduce installation time and improve installation reliability.

## HOT WATER

Ensuring enough hot water can be generated efficiently and quickly is crucial to a heat pump system. The Logic Air pre-plumbed hot water cylinder can generate hot water faster than some of the most popular heat pump DHW cylinders in the UK, saving money and energy.

## SIMPLE TO USE, APP CONTROL AND ONLINE HEALTH CHECKS

Halo Air is a new generation of heat pump thermostats connected to your phone with options to connect to our customer service team. Halo Air automatically makes your heating system more efficient, enables remote control and 24/7 system performance data. All wrapped up in an easy to use controller.

## SAFE AS STANDARD

R32 refrigerant has a flammability rating almost 85% lower than propane alternatives. With a '0' ozone depletion rating and a low global warming potential, R32 is safe efficient and reliable.

Scan me for full technical specification

The HP290 monobloc heat pump offers a low-GWP refrigerant with high efficiencies.

## KEY FEATURES

- ✓ Low GWP R290 Refrigerant
- ✓ Highly efficient: SCOP up to 500%\*
- ✓ Intuitive control: smart weather compensating controls
- ✓ Low carbon refrigerant: zero ozone depletion and low global warming potential
- ✓ Smart grid and solar PV compatible
- ✓ Monobloc technology enables easy installation and servicing
- ✓ Domestic hot water: hot, efficient and fast re-heat times with the ideal heat pump cylinder range
- ✓ Flow temperatures up to 75°C

**A+++ EFFICIENCY RATING**

\*Performance data in accordance with EN 14825 : 2016, EN 12102, EN 14511 : 2018. The energy efficiency provided may not correspond to the actual energy once installed in a building, as the efficiency is influenced by other factors such as heat loss in the distribution system and the capacity of the products in relation to building size and characteristics.

## OVERVIEW

The HP290 can provide efficient heating and hot water throughout the year by utilising our pre-plumbed and pre-wired cylinder. The system offers our users an aesthetically pleasing heating solution and when paired with Halo Lite RF, a great user experience.

Our heat pumps are supported by our industry leading customer service and warranty team which is based in the UK and is open 364-days a year, providing customer service and technical support.

# THE TECHNOLOGY

## HEAT PUMP CYCLE

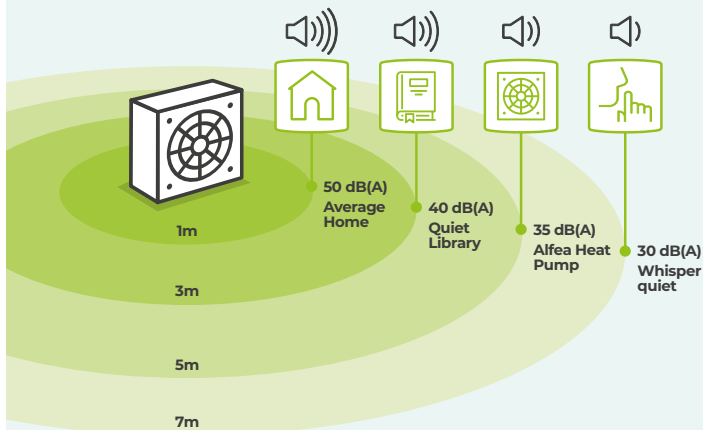

**1. Capture:** The fan passes ambient air over extremely cold liquid refrigerant. The refrigerant captures the heat from the ambient air and becomes a warm vapour.

**3. Exchange:** The heat in the hot refrigerant is then transferred to the heating and hot water cylinder through a heat exchanger.

**2. Compress:** The warm refrigerant vapour passes through a compressor which produces hot refrigerant and usable heat.

**4. Expand:** Once the heat has been transferred to the house, the refrigerant passes through an expansion valve which reduces its temperature, making it cold again and enabling it to capture heat from the ambient air, continuing the cycle.

## SOUND PRESSURE AND SOUND POWER

### Sound power

The way we calculate the sound a heat pump makes is by measuring the sound power and sound pressure. The sound power level is the sound that is emitted from the unit in laboratory conditions and is displayed on the ErP label.

### Sound pressure

The sound noise level (sound pressure) measures the level of sound that you hear above the sound that already exists in the background. Sound pressure is lower than sound power.

### Quiet Mark

The Logic Air range of heat pumps have all achieved Quiet Mark certification. Quiet mark is associated with the noise abatement society and technically assesses and certifies the quietest heat pumps in the heating industry.

# COP & SCOP MEASURES OF EFFICIENCY

## COP - COEFFICIENT OF PERFORMANCE

The coefficient of performance (COP) helps us measure the efficiency of a heat pump. The COP calculates the amount of heat energy a heat pump can create from each unit of electricity it uses.

$$\text{COP} = \frac{\text{HEAT OUTPUT}}{\text{ELECTRICAL INPUT}}$$

## SCOP - SEASONAL COEFFICIENT OF PERFORMANCE

The seasonal coefficient of performance (SCOP) is the average COP carried over the annual heating season (the full year).

# LOGIC AIR AND HP290

## PRE-PLUMBED CYLINDER

Scan me for  
full technical  
specification

Our stainless steel pre-plumbed hot water cylinders combine efficiency with practicality. Designed and manufactured in the UK and boasting industry leading reheat times, our cylinders have been designed to store and generate hot water efficiently using a heat pump.

DESIGNED  
TO FIT IN UK  
HOMES

### KEY FEATURES

- ✓ 60°C DHW
- ✓ 28.5% energy savings\*
- ✓ Built in low loss header or buffer tank
- ✓ 49% faster reheat times\*
- ✓ Fully pre-plumbed and pre-wired

The Logic Air pre-plumbed cylinder range comes in **16 variants** from **single-zone** 150 Litre to **2-zone** 300 Litre

### NEW COMBINED DHW AND BUFFER CYLINDERS

The new pre-plumbed cylinder range includes models with an integrated buffer. Housing the DHW cylinder and separate buffer tank in the same case, alongside pre-wired circulation pumps and all the standard pre-plumbing components.

### NEW LOW LOSS HEADER

Our new pre-plumbed low loss header cylinders de-couple the heating system from the heat pump protecting flow rates and enabling 2-zone control.

\*Performance figures from for HWA 002:2020 heat pump test results

# HALO AIR

## ROOM THERMOSTAT

Scan me for full technical specification

Halo Air is a programmable room thermostat, based on the current Ideal Halo platform that is designed and developed to work seamlessly with the new Logic Air monobloc heat pump.

### KEY FEATURES

- ✓ Designed for Logic Air
- ✓ Easy to install
- ✓ Full heating and hot water control
- ✓ Load compensating control

## HALO AIR RF 234790

Halo Air RF is a wireless programmable room thermostat designed specifically to work with Logic Air.

Halo Air offers fast, flexible and intelligent wireless technology and is packed with features that enable simple and easy heating and hot water control.

\*2 year parts and labour warranty available when registered within 30 days of installation. Terms and conditions apply.

## HALO AIR **WI-FI** 234819

Halo Air Wi-Fi is engineered specifically to work with Logic Air heat pumps and allows flexible control of heating and hot water with the intuitive Halo app, which can be connected through smart home devices like Amazon Alexa and Google Home.

It's simple to install, straightforward for everyone to use, no matter where they are.

\*2 year parts and labour warranty available when registered within 30 days of installation. Terms and conditions apply.

## HALO AIR **2-ZONE RF** 234792

Halo Air 2-Zone RF incorporates an additional programmable room thermostat with the extra functionality of controlling the temperature of a second zone.

\*2 year parts and labour warranty available when registered within 30 days of installation. Terms and conditions apply.

## HALO AIR **2-ZONE WI-FI** 234791

# LOGIC AIR

## CONTROL BOX

235797

The Logic Air control box is the central hub for the heat pump system, linking the heat pump to your heating and hot water cylinder. It enables in depth control, scheduling, connectivity and performance diagnostics.

### INBUILT HEAT PUMP CONTROLLER

Our inbuilt controller uses tried and tested technology to keep you warm efficiently. From scheduling to diagnostics our controller gives you control and transparency.

### QUICK START SET UP

Our new quick start menu makes commissioning fast, easy and accurate. In just a few steps the heat pump can be up and running and tuned to its most efficient parameters.

### CONNECTIVITY

The Logic Air control box is compatible with Halo Air, Link Cellular heat pump diagnostics and 3rd party thermostats, giving you access to online control, scheduling and remote diagnostics from anywhere in the world.

### PERFORMANCE DIAGNOSTICS

The Logic Air control box gives you access to the efficiency of the householders heating system, helping them to understand the health of their heat pump system at a glance.

# HP290

## CONTROL BOX

239386

**The HP290 control box is a hub for a HP290 heat pump system. By bringing all electrical connections to one central location, the HP290 control box enables a fast and simple installation experience.**

### DESIGNED FOR HP290

Designed by Ideal Heating, the HP290 control box offers heat pump installers a quick and simple installation.

### HYBRID AND CASCADE READY

For more complex installations, the HP290 control box can seamlessly bring the HP290 heat pump together with either a boiler in hybrid mode or another HP290 in cascade installations.

### FLEXIBLE

The HP290 control box gives the HP290 the ability to work with all types of UK heating systems, from traditional radiators to underfloor heating, with the ability to control more than one heating zone.

### PERFORMANCE MONITORING

With the HP290 control box, end users can see how their heat pump system is performing on a daily, weekly and annual basis, giving them piece of mind that their heat pump is working as it should be.

5kW - AH526349 | 6kW - AH526346 | 8kW - AH526347 | 10kW - AH526348

The Ideal Alfea uses intelligent technology to redefine how we heat our homes. Our new refrigerant balances industry-leading efficiencies with an ultra-low environmental impact, using patented technology to match performance with reliability.

### KEY FEATURES

- ✓ Suitable for new build, social housing and retrofit
- ✓ ERP A+++
- ✓ Quiet noise level: 35 dB(A)
- ✓ 474% rated efficiency (COP)
- ✓ R32 refrigerant

### ENGINEERED FOR RELIABILITY

The Alfea A.I. range has a patented coaxial heat exchanger, a unique technology that has been developed to maximise the heat pump's performance.

This enables us to achieve unrivalled reliability and drives up efficiency. Our heat exchanger uses large water ways and tube in tube technology to ensure really good flow rates. We then capture all the energy from the heat exchanger by immersing it into our buffer tank and combining it with our backup immersion to speed up installation time and free up space.

The Ideal Alfea heat pump is redefining how we heat our homes, providing low carbon heating that is efficient, reliable, and effortlessly simple to use.

# INDUSTRY LEADING CUSTOMER SERVICE

## EXPERTS TOGETHER

We are committed to delivering the highest level of customer service. Experts together with over 140 years experience of heating and hot water, we know how important confidence and trust are to our customers.

## 364 DAYS A YEAR

We are is on hand to ensure you have the support you need. Our dedicated customer service department is available 364 days a year.

## TEAM OF EXPERTS

We also have a team of expert engineers, fully trained to exacting standards and Gas Safe registered, on hand to provide one-to-one advice on the road, over the phone or online ensuring you're fully supported, wherever and whenever you need.

## IDEAL PARTNERSHIP

[ideal-partnership.co.uk](http://ideal-partnership.co.uk)

View your Ideal boiler installations from one convenient place. CSR credits are available to support your local community each time you register your development.

- > Access to warranty certificates and gas safe certification
- > Running balance of CSR contributions
- > Immediate access to warranty certification to verify if units are still within warranty period
- > Overview of installing contractor
- > Historic portfolio of Ideal housing stock
- > View your Ideal boiler installations from one convenient place.

Partnered with Ideal our independent SAP Solution consultants Briary Energy can offer you a complete value-engineered solution to meet Building Regulations Compliance.

Our aim is to give you the most cost effective solution for your build, including building fabric, U-value calculations, thermal bridging, ventilation, heating and renewables.

As part of the Ideal Package, we will keep you up to date with the latest legislation helping you keep ahead of the game. We can even promise any question will be answered within 24 hours.

## CONTRACTOR CONNECT

Register your boiler for building regulations compliance with Gas Safe Register for FREE with Contractor Connect. Get instant warranty certificates and earn great Contract Support rebates.

- > Immediate access to download all warranty and Gas Safe certification
- > Ideal warranty registration and Gas Safe all in one easy process

- > Register your boiler for a FREE building regulations compliance with Gas Safe Register through your account.
- > Historic registrations at your fingertips
- > Registration of Heat Exchanger for 10 year warranty, if installed with an Ideal filter
- > Transmits data into sister portal for social client to access

Flat roof weather collar	152259

### VERTICAL FLUE WITH LOFT AIR INLET

FLUE	PART NO.
Air inlet for vertical flue	203136
Flue vertical connector	208175
Vertical flue terminal	203134
Weather collar pitched roof	152258
Flue extension 1m with bracket	203129
Flue extension 1m pair (Ø80mm)	203142

# HIGH LEVEL FLUE OUTLET KIT

These easy to install kits allow the boiler flue outlet to be extended external to the building, upwards to provide a flue exit at high level, overcoming problems associated with plume emission. The kit is simple to retrofit if necessary.

An external 60mm diameter flue leads from the boiler terminal (which includes a 90° bend at the flue exit) to terminate with a 90° bend complete with grille. Push fit 1m extension pipes are used as required, and the fixing clips supplied support the system from the wall. Both 90° and 45° bend are available to provide routing options.

#### The kit comprises:

- 1 x Flue bend
- 1 x 60mm flue exit bend
- 1 x 60mm horizontal flue exit
- 1 x 60mm x 500mm flue extension pipe

This kit is for use with horizontal non-telescopic and telescopic flue kits 208169, 208171, 208174 and 217442.

The standard terminal nose is replaced with the high level terminal.

FLUE	IDEAL PART NO.
Horizontal flue non-telescopic 0.6m	208171
High level flue outlet kit (Ø60mm)	208178
Flue extension 1m for high level flue outlet (Ø60mm)	203228
High level flue bend 90° (Ø60mm)	203229
High level flue bend 45° (Ø60mm)	203230

Diagram representative only

**NOTE:** Please refer to the installation and service manual for assistance in calculating flue lengths. Adequate support must be provided for the flue in accordance with the installation instructions. If additional elbows to those supplied in the High Level Flue Outlet kit are used, deduct the following resistances (metres) from the maximum boiler flue length.

45° Left  
or Right

Vertical

Horizontal  
Left or  
Right

**IMPORTANT**  
Flue must  
always slope at  
least 1.5°  
back to the  
boiler

RESISTANCE	METRES
90° elbow	1.4
45° elbow (pair)	1.25

**NOTE:** If additional elbows to those supplied in the High Level Flue Outlet kit are used, deduct the following resistances (metres) from the maximum boiler flue length.

# REAR FLUE & HIGH RISE FLUE OPTIONS

The Logic MAX Heat and Logic+ Heat both come with an optional rear flue outlet which means it can be installed directly behind the boiler rather than on top of it.

## REAR OUTLET FLUE TERMINAL (55/80) - 80MM

FLUE	PART NO.
Rear outlet flue outlet kit (55/80)	205990

**NOTE:** Length is wall thickness. Minimum wall thickness permissible is 115mm. No extensions are permitted.

FLUEING ACCESSORIES	PART NO.
Flue finishing kit (55/80)	206151

LOGIC HEAT ONLY	PART NO.
High level outlet kit (55/80)	205989

**NOTE:** Please refer to the installation and service manual for assistance in calculating flue lengths. For 1m extension and elbows use standard parts 203228/9 & 30.

## HIGH RISE FLUE KIT

FLUE	PART NO.
Horizontal high rise flue (0.6m long)	223629
Horizontal high rise flue (1m long)	224701
Flue extension (1m) high rise	224702
Balcony kit high rise	224703

**NOTE:** Similar to 208171 but with an aluminium flue duct and unpainted air duct to comply with the revised Building Regulations for buildings over 18m high.

# FLUE ACCESSORIES

When Building Regulations direct that combustible materials must not be used in the external walls of high-rise residential buildings, our high rise flues with an inner aluminium flue duct should be used.

# HIGH RISE FLUE ACCESSORIES

The Building Regulations (Amendment) 2018 for England directs that combustible materials must not be used in the external walls of high-rise residential buildings, i.e. those above 18m tall (typically 6 stories). The 'external wall' includes anything located within any space forming part of the wall. This is relevant to the installation of all new gas boilers with horizontal flues in high-rise residential buildings, as the ban now excludes those flues that contain combustible materials such as a polypropylene plastic inner flue duct. Similar regulations also apply in Wales and Northern Ireland, with Scotland having their own regulations.

Ideal Heating have a range of high rise flues and accessories which comply with the revised regulations for high-rise buildings. Introduced from October 2019, they are direct replacements for the standard horizontal flues and accessories. The main difference is that the inner flue duct is aluminium rather than polypropylene plastic. Aluminium is classed as having class A fire resistance according to European Standard prEN1856-1 May 2019 which covers metal chimneys and flues, and by Europe Decision Document 96/603/EC covering construction products.

Externally the high rise flues look similar to the previous generation Ideal Logic flue (pre 2013) and the flue terminal is still black plastic. However, the outer air duct is no longer powder coated white and has a galvanised finish; but only a small length of this will be seen above the boiler. The elbow and wall seals have not changed. As the terminal, elbow and wall seals are not part of the make-up of the external wall their materials are not affected by the revised regulations. The flue terminal design has the air inlet underneath and the aluminium flue duct can be seen through the air inlet.

The high-rise horizontal flue terminals do not have a removable terminal nose so cannot be used with flue accessories 208178 High level flue outlet kit, 211302 Soffit kit, 208177 Balcony flue outlet kit and 208176 Flue deflector. However, new dedicated high-rise accessories are available to cover more installation configurations. These all have aluminium flue ducts to comply with the amended regulations.

Ideal part no.  
201893

# INSTALLATION ACCESSORIES

Our range of installation accessories are widely available due to our excellent distribution network. Our installation accessories include a range of brackets and stand off kits as well as a range of kits to help you deal with any situation.

# IDEAL THERMSTORE INDIRECT CYLINDER

Scan me for full technical specification

**CYLINDER 90 120 150 180 210 250 300 400 L**

90 - IDEPLUIN090 | 120 - IDEPLUIN120 | 150 - IDEPLUIN150 | 180 - IDEPLUIN180 | 210 - IDEPLUIN210  
250 - IDEPLUIN250 | 300 - IDEPLUIN300 | 400 - IDEPLUIN400

The Ideal Thermstore range of stainless steel unvented indirect cylinders are manufactured to the highest standards. The range features 8 models and two years parts and labour warranty so you can be sure the Thermstore combines the twin demands of excellent product quality and outstanding value.

## STANDARD APPLIANCE

- > Hot water draw off 22mm compression
- > Temperature and pressure relief valve 92-9°C/6 bar
- > Hot water secondary return 22mm (not fitted to cylinders below 210 litres)
- > Immersion heater 1¾" BSP 3kW
- > Cold supply 22mm compression
- > Dual control/overheat thermostat pocket
- > Boiler control sensor pocket (spare)
- > Primary flow 22mm compression (28mm tails for 400 litre model only)
- > Primary return 22mm compression (28mm tails for 400 litre model only)

## STANDARD APPLIANCE COMPONENTS

- > Combination inlet group incorporating pressure reducing valve, strainer, check valve, balanced cold take off point, expansion relief valve and expansion vessel connection points
- > Potable expansion vessels complete with flexible hose and wall bracket
- > Tundish
- > Dual control thermostat and combined overheat thermostat
- > Two port 22mm zone valve for primary circuit
- > Wiring junction box for primary system

---

With over 50 years of experience in designing, engineering, and manufacturing electric heating and hot water appliances the Atlantic brand has become synonymous with premium, high efficiency products.

Atlantic has engineered and developed an extensive product range that includes panel heaters, electric radiators, towel rails and hot water cylinders. Our innovative, reliable and energy efficient product portfolio offers the perfect electric heating solutions for new builds, bungalows, flats, apartments, hotels, offices and commercial establishments.

# NANTO LITE

## HOT WATER HEATER

Scan me for full technical specification

The Atlantic Nanto Lite is a highly-efficient unvented hot water heater designed with both space-saving and energy-saving features. The unit is engineered to provide hot water almost instantly at the point of use, making it perfect for those seeking convenience and comfort.

The Nanto Lite features a diamond-quality enamel glass tank that is both durable and long-lasting, and incorporates magnesium anodes to provide added protection and increase the lifespan of the tank by up to 50%. With its sleek design and energy efficient features, the Atlantic Nanto Lite is the ideal choice for homeowners looking to upgrade their hot water system.
