

WE BELIEVE IN  
GIVING YOU  
INSIGHT

# Managing your boiler stock just got smarter

ID-Cellular is an innovative connected solution from Ideal Boilers that will allow you to remotely monitor your boiler stock without the need for Wi-Fi or an internet connection in the home. No reliance on tenant Wi-Fi and no need to install a separate internet connection that needs maintaining.

Combining insight and efficiency for enhanced customer service

#### REMOTELY MONITOR DATA

Connecting your boiler stock and remotely monitoring data means you will see fault codes and receive alerts when boilers are in fault.

#### INSIGHTFUL TECHNOLOGY

Gain insight not only into the health of the boiler, but into the energy consumption and heating usage in the house which may help to identify unusual activity, such as tenants not heating their homes adequately.

#### ENGINEER EFFICIENCY

Enable engineers to see data from the boiler before they even get to site, allowing them to prepare more efficiently.

#### SIM CARD CONNECTIVITY

The ID-Cellular device contains a SIM card and connects to the internet via GPRS to transmit data to the cloud which you can then see in the Ideal Partner Portal.

#### OFFSITE ADVICE

See information about the boiler whilst on the phone to a tenant and be able to advise them over the phone.

## The Ideal Partner Portal

### MULTIPLE PLATFORMS

The Ideal Partner Portal is an easy to use web based portal. It can be accessed via a computer, tablet or mobile phone so even engineers in the field can use it.

### INTUITIVE INTERFACE

The portal has an intuitive summary dashboard, which allows easy access to real time boiler data in simple charts and graphs.

### CUSTOMISE ALERTS

The portal can be configured to send email alerts and summaries and different users can be given different levels of access to suit their roles.

### REMOTE RESET

The portal also allows for the remote reset of the boiler, a feature that has the potential to save an engineer visit.

### SECURITY GUARANTEE

The portal is secure and has several features to ensure strict compliance with GDPR giving you peace of mind when handling sensitive data.

Compatible with all  
**Ideal Logic Boilers**

Further information on ID-Cellular is available through your Ideal Key Account Manager who will be happy to discuss how this could benefit you and your customers.
